## Experience

Apr 2021 - Jul 2021

Billeasy | Mumbai

### Frontend Developer Intern

Role Summary: React js developer involved in building user interfaces and front-end features for web applications in an Agile environment. My skills include proficiency in Redux Saga for state management and Material UI for styling, as well as an ability to collaborate with back-end developers and stakeholders to ensure a cohesive end-to-end product

Sep 2021 - Present

Mindbrowser | Pune

### Associate Software Engineer

Role Summary: As a web developer, I develop user-focused features, optimize web pages for speed and scalability, and test for usability. I also manage software workflows, I write reusable and DRY code, making it quick and easy to maintain the code in the future. My strategic design choices have always been focused on driving positive outcomes for the end users.

## Projects

**BirthModel:** Developed Front-end of BirthModel, a clinical decision support platform that synchronizes the delivery of babies for healthcare professionals.

**Stacks:** React js, Material UI & Redux-Saga, Jira and Bitbucket

**Eduna:** As a Front-end React Js developer, built Edunaa, an e-learning platform for students, instructors, and administrators.

**Stacks:** React JS, Redux-Saga, Material UI, Social Auth, Video.js and Bitbucket

**Fallbright:** Led the development of Fallbright, a feature-rich SAAS platform for employee management that simplifies HR processes and enhances organizational efficiency, as a front-end React js developer.

**Stacks:** React js, Material UI, Redux-Saga and Recharts, Jira and Bitbucket
